## **RESIMAC SOLUTIONS,** **SAFEGUARDING STATIONARY** **COMPONENTS IN HYDROPOWER - 1**

In the world of hydropower, maintaining the integrity of turbine components is crucial for efficient and reliable energy production. Stationary components, such as stay vanes, head covers, bottom rings, and scroll cases, are particularly vulnerable to erosion and corrosion, which can significantly impact their performance and lifespan.

## **RESIMAC SOLUTIONS:** **REPAIR OF ROTATING** **COMPONENTS IN HYDROPOWER** **APPLICATIONS - 2**

In our previous blog post, we discussed the protection of stationary components in hydropower systems against erosion and corrosion. Today, in the second part of our two-part series, we focus on the repair and protection of rotating components, such as wicket gates, Kaplan blades, Francis runners, and runner hubs. These components are critical to the efficient operation of hydropower turbines but are often subjected to severe cavitation and corrosion.

## **HAPPY CIVIC HOLIDAY**

Civic Holiday in Ontario, observed on the first Monday of August, is a cherished mid-summer break that offers residents a chance to relax and enjoy the vibrant summer season. Originally established to honor the achievements of local communities, it has evolved into a day for family gatherings, outdoor activities, and community celebrations. Whether you're enjoying a backyard barbecue, exploring local parks, or simply waving your flag with pride, Civic Holiday is a perfect opportunity to take a pause and appreciate the spirit of togetherness that defines Ontario.
